⁵ Requires a volume control rough-in valve 29 034 (1/2") sold separately.

⁶ Requires a 5-port diverter rough-in valve 29 035 sold separately.

Unique spaces demand unique finishes. Today's bathroom is a place for relaxation and enjoyment—a harmonious space where faucets and shower products are chosen as much for their visual appeal as for their function. The addition of black and white finishes to the Veris™ collection increases design opportunities enabling the creation of new and exciting bathroom schemes.

- **Velvet Black (KS0)** - bold and evocative, can be used as an accent color against a background of neutrals. Paired with a richer palette of slates and plums the tactile “velvet” finish reveals its sensual side.
- **Moon White (LS0)** - pure and minimalist, these glossy white faucets are destined for architectural environments where their “cool” looks can be fully appreciated.

These finishes bring a new look to the characteristic shapes of Veris™. Chrome accents enhance their appearance and draw attention to the design details.

Veris™ in black and white is made-to-order, with a 10 to 12 week lead-time.

Performance Features:

- The smooth, precise action of **GROHE SilkMove®** ceramic cartridge technology offers lifelong, effortless water control.
